

LITTLE PROSPECT OF EARLY PEACE

Dr. Jacobs of Holland Expresses View of Situation to President Wilson.

Washington, Sept. 15.—President Wilson was told today by Dr. Aletta H. Jacobs of Amsterdam, Holland, that there is little prospect of European peace in the near future. Dr. Jacobs was one of the delegates to the women's peace conference held at The Hague several months ago.

Dr. Jacobs talked with the president about the plan of women peace advocates for united action for peace through the United States and other neutral nations. She said later that she did not expect the president would take any definite steps in this direction immediately.

FARMERS MUST PLANT GOOD SEED

Salt Lake, Sept. 15.—Utah potatoes must be raised better. The potato uplift must come if Utah would lay any claim to raising potatoes which compare with the better class of spuds produced by near-by states.

So says Professor George R. Hill, plant pathologist of the Utah experimental station, in connection with the Utah Agricultural college at Logan. Professor Hill returned yesterday from a mission in Sevier county in connection with the regeneration of the potato, and is at the Hotel Utah.

Professor Hill comes back from Sevier county very enthusiastic over what has been done there to improve the quality of Utah potatoes. High-bred potatoes are a success there, he said, and can be just as successful in every other county of the state. He said there was no reason why Utah should not raise the finest potatoes in the west, provided only that the farmers go about it right.

"I have just returned from Sevier county to look at the potatoes the farmers raised with the Carbondale seed. They are fine; equal to anything raised in Colorado. Not only was this good seed used, but the farmers properly looked after the care of the potatoes while growing."

"The experiment has proved that the trouble with most of the potatoes raised in Utah has been that the growers have planted 'culls' and expected to harvest first-class potatoes. As I said in the beginning, with the reference to horses, it cannot be done. If good seed is used, any part of this state can raise as good potatoes as have been raised this season in Sevier county."

FUNERAL TRAIN BRINGS MAGNATE

Sir William Von Horn Laid to Rest Beside Parents in Joliet, Illinois.

Joliet, Ill., Sept. 15.—The body of Sir William Van Horn, Canadian railway magnate, arrived here today on a special funeral train from Montreal. Burial ceremonies here were simple, the principal funeral services having been held in the Canadian metropolis. Sir William's body was placed beside those of his father and mother in a local cemetery.

STEAMERS COLLIDE IN ST. LAWRENCE

Quebec, Sept. 15.—The Allan liner steamer Pretorian, with 198 passengers, and a heavy consignment of mails from Glasgow, collided with the steamer Kamsan in the St. Lawrence during a heavy fog early today. The collision occurred off the mouth of the Saguenay river, and the Pretorian is now lying anchored near there, according to a statement given out by the line.

Neither the Pretorian nor the Kamsan was greatly damaged, according to the government signal service, and both will be able to proceed as soon as the fog has lifted.

You will be impressed by the stocks, the variety of the assortments, the correctness of the styles, the fairness of the prices. Let us demonstrate to you during this Exposition, how Wrights' New Policy has produced for you profit and service, Wrights' Greater Store.

This Millinery Floor will be a picture worth seeing. Bright and early tomorrow morning the hats you've seen will disappear and—behold a Wonderland of Millinery. Even those of you who have been here recently will see new hats—great shipments which have not been shown to a single soul.

Distinctiveness seems to be the keynote in millinery this season—you'll want a hat entirely different and we will show it to you.

Newer Knickerbocker Pants—suits made of fabrics like Dad wears. Two pairs of pants, if you wish, Basement.

You'd Better Select Your Fall Suit Now; You Really Should

We advise the early selection of a suit mainly because the new ones are going out so fast. It is so much more satisfactory to select from a stock at its best—and our stock is now at its best. More than a hundred of the new suits have gone out already—many others have been rushed in by express to take their places and we fear that if you leave it too late there will be disappointments.

Another good reason for selecting now—our New York Office reports new orders rushing in from all sections of the country—there's a very big chance of there being a scarcity of suits in the heart of the season.

See especially during the demonstration the suits specially priced at 14.95 and 19.75.

In all this planning, the wearables for men have not been overlooked. We are confident that in this store's history the offerings have not been so good.
